

// PROJECT DESCRIPTION & BACKGROUND

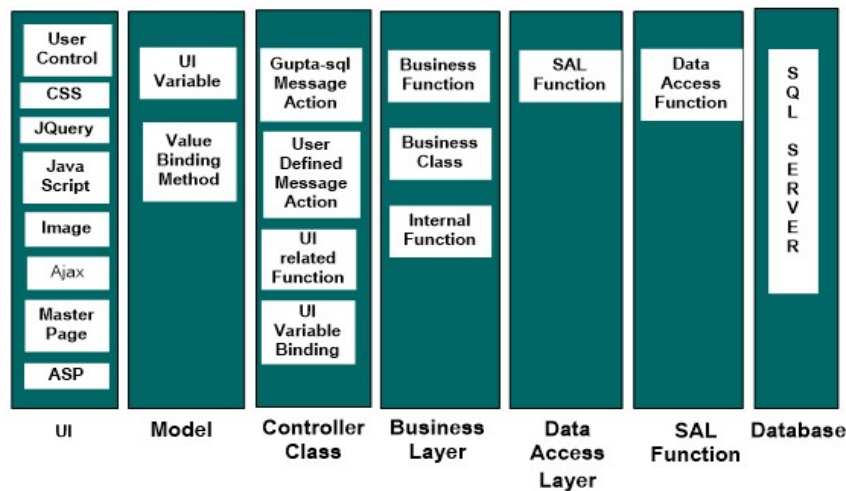

The Company had been making use of a window based application to cater to the requirements of insurance industry in respect of Quotation and Policy administration across multiple lines of business including Home owners, Auto, Watercrafts, Valuables, Umbrella and many more. This application was built in GUPTA SQL, Centura with MS SQL Server and was being maintained by the IT-division of the Company.

ADA Software was engaged for migration of this non-life insurance application to a modern environment which would lead to substantial cost reduction in terms of operation and maintenance.

Migration tool of ADA was customized for re-engineering of the application, generation of the source and recovery of .NET(C#) classes containing all the business logics and functionalities.

Platform used for Web based solution : Microsoft .NET Framework 2.0, Asp.net using C#, WebServices, SOAP, Telerik Components, MS SQL Server 2005. The code was generated in SPRING.Net Framework.

// MIGRATION ARCHITECTURE

// BENEFITS TO THE CUSTOMER
